T-Mobile USA. US GAAP reconciliation: CCPU¹.

The cost of serving customers, or cash cost per user ("CCPU"), includes all network and general and administrative costs divided by the average total customers during the period. We believe CCPU is an operating measure of the cost of serving a customer, and can be calculated and reconciled to T-Mobile USA's interim statement of operations² as follows:

| US \$ m illion | Q2/03 | Q3/03 | Q4/03 | FY/03 | Q1/04 | Q2/04 |

T-Mobile USA. US GAAP reconciliation: CPGA.

Cost per Gross Add ("CPGA") is calculated by dividing the costs of acquiring a new customer, consisting of customer acquisition costs plus the subsidy loss on customer acquisition related to equipment sales, divided by gross customers added during the quarter. We believe that CPGA is a measure of the cost of acquiring a customer and we use CPGA as an integral part of our internal reporting. CPGA can be calculated and reconciled to T-Mobile USA's interim statement of operations¹ as follows:

| US \$ million | Q2/03 | Q3/03 | Q4/03 | FY/03 | Q1/04 | Q2/04 |

T-Mobile USA. US GAAP reconciliation: OIBDA and OIBDA margin.

OIBDA is a non-GAAP financial measure, which we define as operating income before depreciation and amortization. In a capital-intensive industry such as wireless telecommunications, we consider growth in OIBDA as well as improvements in OIBDA margin to be meaningful indicators of potential future profitability. OIBDA and OIBDA margin should not be construed as alternatives to operating income/loss, net income/loss or net income/loss margin as determined in accordance with GAAP, as alternatives to cash flows from operating activities as determined in accordance with GAAP or as a measure of liquidity. We also use OIBDA as an integral part of our internal reporting to evaluate the performance of our senior management. We believe that operating income (loss) and operating income (loss) margin are the financial measures calculated and presented in accordance with GAAP that are the most directly comparable to OIBDA and OIBDA margin. OIBDA can be reconciled to T-Mobile USA's operating income (loss)¹ and OIBDA margin can be reconciled to T-Mobile USA's operating income (loss) margin¹ as follows:

| US \$ million | Q2/03 | Q3/03 | Q4/03 | FY/03 | Q1/04 | Q2/04 |
